ABOUT THE

Status of the Ordinances Providing for Their Construction.

THEY ARE NOW ON THEIR PASSAGE

As Soon as the Plans for the South Side Bridge Are Completed the Ordinance Providing for Its Construction Can Be Passed-If Business Is Expedited Contracts for Bridges Can Be Awarded by Sept. 30.

On Feb. 20, nearly five months ago, the voters of this city at the polls de-cided that two bridges should be built; one was to connect the central city with the South Side over Roaring Brook and the other was to extend to the West Side over the Lackswanns river at Linden street. Work on these bridges has not yet begun and those who voted both for and against them are today asking "Where are we at?" in

this bridge matter. At the last meeting of select council the ordinance providing for the erec-tion of the Linden street bridge passed first and second readings, and the Roaring brook or South Side bridge ordinance came up for third and final reading, but was laid over for the reason that no plans were attached. clause in the first section of each ordinance reads "in accordance with plans prepared by the city engineer, hereto attached, and made a part of this ordinance." Mr. Manley, of the Twelfth ward, announced when this particular passage was read in the Roaring brook ordinance that the measure was of no effect if it passed third reading without plans attached, and on his motion it was laid over.

Under these conditions the ordin ances will remain in the city clerk's office until City Engineer Phillips bas completed the plaus and they are attached according to the provisions made in each ordinance. Mr. Phillips said yesterday that he could not complete the work this week.

WHAT CAN BE DONE. Assuming that the plans will be completed July 19, the regular meeting night of select council, it is possible that by Aug. 25 the ordinances will have been approved by the mayor, and that the work of erecting the bridges will be commenced by September 30. This conclusion is based on the following possible process and dates of the passage of the two measures;

Third and final readings in select council July 19, to common council and referred to committee July 26, first and second readings in special meeting of common council Aug. 2, third and final reading in special meeting of common council Aug. 16. After this date Mayor Connell will have ten days to consider the ordinances, and presuming that his signature is attached on Aug. 20, the contracts for the work should have been advertised and let by Sept. 30

According to a recent resolution of councils, before the ordinances are finally approved by the mayor, they must be passed upon by an expert bridge engineer. Unless this expert examination is made between July 26 and Aug. 2, the matter may be still up for consideration. further delayed in case any changes

are made in the plans.

After this general summary it may Williams & McAnulty After this general summary it may appear that the city engineer has been unduly slow in doing his part of the work. Such a comment is undeserved work. Such a comment is undeserved from the fact that the small working force at Mr. Phillips' command who nave undertaken so great a work in connection with regular duties, has made the time consumed inevitable. However, it is true that a certain few councilmen who favored the Mulberry street site for the Wood Side bridge, are in a great measure responsible for the delay. After unsuccessfully trying in every way possible to secure a legal opinion that the bridge could have Mulberry street for a terminus, the

question of the Swetland street grade was raised. THAT SWETLAND STREET GRADE. For some time it was maintained that the present grade of Swetland street is impractical for heavily loaded wagons, which objection might neces-sitate changing the proposed Hyde Park terminus of the bridge to a point further north. It developed later that the present Swetland etreet grade is not in accordance with the grade regularly established some time ago and approved by councils, which would raise the lower part of the hill some six feet and reduce the hill to a grade about 1 7 per cent, less than the West Lackawanna avenue bill. It has since been ascertained that if necessary a viaduct can be built from the Swetland street bridge down toward the terminus of the big bridge, but for only a por-tion of the distance, which would still further increase the established grade. During the period in which this question was being agitated, which oc cupied six weeks more or less, the city engineer was uncertain in carrying out

his work and was so bothered with the points raised that a halo of indecisiveness was necessarily hung over the plans and impeded the work. Assuming that the contracts for Brook.

In response to requests from business men up and down the valley who feel that the first train on the Elks excursion to Lake Ariel Wednesday is too early, a second train has been arranged for, to leave Scranton at 1.30 o'clock Wednesday afternoon. This will give its passengers several pleasant hours at the lake and enable them to lose only a half a day from business.

Assuming that the contracts for building the bridges are let by Sept. 30, the work must be completed by July 30, 1895, according to provisions of the ordinances which require that the excavation, masonry and grading shall be completed within six months after the execution of the contracts, and that the superstructure shall be completed within four months after the contracts for building the bridges are let by Sept. 30, the work must be completed by July 30, 1895, according to provisions of the ordinances which require that the excavation, masonry and grading shall be completed by the provisions of the ordinances which require that the excavation of the contracts and that the contracts for building the bridges are let by Sept. 30, the work must be completed by an excavation. The provisions of the ordinances which require that the excavation, masonry and grading shall be completed within six months after the execution of the contracts.

WORKING FOR THE BABIES.

lishment Where Lactated Food Is Prepared for All Parts of the World.

Mothers are everywhere related by the mere fact of motherhood. Their joys, their sorrows and their needs are the same all over the world." Think of the countless babies in Canada, in Canada, and even in dis-tant Australia, wno are growing up rosy-cheeked and bright-eyed on the same diet of lactated food that moth-

ers in America know so well. Only tacss who have visited the big established in Burlington, Vt , in summer have any idea of the tremendous amount of this world-famous baby food which is weekly produced at the central establishment. As the weather grows warmer every effort is made to meet the enormous demand for lactated food, not only in Ithis country and Canada, but from the various branches in foreign countries. It is from the London branch house that goods are forwarded to the large cities of Europe and the east, among the largest ship-

snd the east, among the largest shipments being those sont to India and to the Anstralian branch, located at Sydney, N. S. W.

A visit to this establishment in Burlington never fails to make a lasting impression on every mother and on any one who is at all interested in the question of a reliable baby food that shall be a genuine substitute for mother's milk. The absolute cleanliness in every process, and the arrangements for meeting the big demands in July and August without undue haste and carelessness that might interfere with the perfection of the fool, always delight visitors.

Strikes are unknown among all these busy persons, b-cause, with the con-stant demand for lactated food at all seasons, wages are kept up, so that the employed have come to feel their own interests bound up with those of the establishment. By this friendly, cooperative spirit among all who are concerned with the preparation of lac tated food, it has been possible to pro-duce a beby food absolutely pure, all the ingredients of which are carefully elaborated and conscientiously combined.

Physicians, after inspecting these buildings, which are made of neatness and convenience, unhesitatingly pre-scribe lactated food for invalids, espe-cially as the direct supervision of the preparation of the food has been from first to last under one of the professors Vermont's famous university. Luctated food is today everywhere prescribed as the one one real substitute for healthy mother's milk, combining excellence never before secured of marvellons

never before secured of marvellons nourishing powers, and yet being taken by all babies with decided relish when every other food is rejected.

All that is needed to keep baby perfectly well summer and safe from cholers infantum and diarrhes, that carry off so many thousand baties during the hot weather, is proper nourishment and cleanliness. These two indiscensable qualities are found in Mayor Conneil approved last week an ordinance directing City Engineer Phillips to prepare plans and specifications and to render an estimate of cost for paying of West Lackawanna ave-

AN OPEN AIR CONCERT.

Given by Bauer's Band in Front of Elks'

Building. Bandmaster Bauer gave a very delightful open air concert last evening. before a most appreciative andience in front of the Elks' building on Franklin avenue. The street was crowded, and

the Elk's rooms were filled with mem-bers and their friends.

The programme which Professor Bauer had arranged was of the highest order and was rindered very coarmingly. The concert opened with a very fine rendition of Linden's "March of the Uniformed Bank," which was followed by the selection, "Don Carlos," by Verdi. Another selection was a deeriptive place entitled "An Indian War Dance," which seemed to be very popular with the assembled multitude, for they shouted and applauded, and would not be satisfied until it was repented.

It is a weird piece and was rendered in such a style that one would not need a very vivid imagination to imagine nimself out on the plains surrounded by a band of red skins. The ever pop ular and catchy "Cocoanut dance" next rendered and was received with due appreciation. There was much regret on the part of all those present when the last number on the pro-gramme, the "Columbian National Pot-Pourri," was played.

Through his superb concerts Professor Bauer has won great public favor and it is to be hoped that he may be heard often during the summer. The concert last night was a forerunner of the excursion to be conducted by the Elks to Lake Ariel tomorrow. Bauer's band will be in attendance, and the Elks have spared no pains to give their friends a most enjoyable time,
